FastTrack Online
Document Remediation Platform

Welcome to FastTrack Online—your quick, effective and affordable solution for accessible document transcription.

Purpose-Built for Education Professionals

Educational institutions continually face the challenge of providing students with timely access to high-quality instructional materials in accessible formats. More so, there remains a distinct and troublesome trade-off between speed and quality.

Welcome to FastTrack Online

Our easy-to-use subscription-based model enables administrators, educators, and those within Disability Support Office to upload, click and go—transcribing any document into multiple formats quickly for delivery to their students. FastTrack Online combines high-level automation with guided user input to effectively and affordably transcribe documents into high quality, reflowed Large Print (Accessible Word), Accessible PDF, and E-text formats.

Reflowed Large Print (Accessible Word)

An accessible Word document contains content reflowed into a single column, converted to large print, and exported to an accessible file format. As a multifunctional accessible format, users can print large print documents from the Word file or experience it as a digital format with improved on-screen readability and an enhanced audio experience (via text-to-speech tools).

E-text

E-text format contains extracted text from the source document with audio directives. More so, text-to-speech tools can process this file to create an audio version of the document.

Accessible PDF

Accessible PDF contains document information, including semantic structure, enabling people to easily navigate and read electronic content using screen readers, screen magnifiers, and joysticks.

The T-Base Difference

T-Base simplifies the fast, secure delivery of accessible communications at an enterprise scale, empowering partially sighted and blind consumers. As an industry leader in innovation for 30+ years, T-Base's single-source solution continues to be the top choice of educational institutions worldwide. By streamlining transcription for braille, large print, audio, accessible PDF, accessible math and more, delivering documents in every alternate format, and providing digital accessibility audits—T-Base significantly reduces expenses and time for educators and students alike.
